

Software Engineer – Backend Python – Cyber Threat Intelligence & GenAI

ABDIMI Othmane

(+33) 7 69 27 40 42 | abdimi.othmane@gmail.com | [LinkedIn](#) | Paris, Île-de-France

PROFIL

Software Engineer with hands-on experience in **Python backend development across CTI and Generative AI**. Dual academic background in **Computer Science Engineering (ISTY)** and a **Master's degree in Cybersecurity** (Paris-Saclay Univ.). Known for **strong autonomy and rigorous development practices** throughout the full software lifecycle, as well as the ability to share knowledge effectively (mentoring of interns and apprentices).

SKILLS

Programming	Python, C, Golang, Bash, C++ (Notions), Java (Notions)
API	FastAPI, Pydantic
IA/LLM	OpenAI, Ollama, Langchain, LangGraph, LangFuse, Copilot
Web	HTML/CSS, Javascript, TailwindCSS, ReactJS, NextJS
Infrastructure	Docker, Kubernetes (k8s), CI/CD
Database	MySQL, PostgreSQL, NoSQL, Cassandra, ArangoDB, alembic
Network	Protocols, OSI Model, Kerberos, IP addressing and subnetting
Web Scrapping	BeautifulSoup, Selenium
Tools	VSCode, Linux, Mac, Windows, KaliLinux, Git (Github/Gitlab), Github Copilot, Poetry, venv

WORK EXPERIENCES

Python Backend Developer | **Gatewatcher** – Puteaux (92) – Permanent | Oct. 2024 - Dec. 2025

- **Development of RESTful APIs in Python for CTI and GenAI projects**: design and implementation of new features, debugging, improvements, unit testing, and development of data collectors (data leaks, malwares, CVEs...), optimization of a combo list parsing algorithm: **+300% increase in supported formats**
- **Integration and deployment of AI agents**
- **End-to-end feature ownership**: requirements analysis, technical decision-making, implementation, testing and stakeholder presentations
- **Production deployment maintenance**: hotfixes, continuous improvements and operational monitoring
- **Collaboration within an international team** following Agile methodologies: CI/CD, code reviews, mentoring and onboarding of interns and apprentices

Cybersecurity Engineer | **Gatewatcher** – Puteaux (92) – Internship | Apr. 2024 - Sep. 2024

- **Development of a Golang CLI SDK** to automate product compliance checks and repetitive tasks from the design phase (shift-left approach)
- **Development of a Python library** for integration with the Reflex SOAR and packages (connectors) for cybersecurity tools: Fortigate, HarfangLab, SentinelOne, Entra-ID, AIONIQ
- **Creation of Docker containers for Gitlab CI/CD pipelines**: unit test execution and package quality checks
- **Technical documentation writing**, unit testing implementation (Pytest) and knowledge transfer to the team

Consultant/ Project Manager | **Spectrum Group** – Antony (92) – Internship | May. 2023 - July. 2023

- **Jira Administration**: workspace configuration, workflow and status design, role and permission management, implementation of automations to streamline team processes
- **Handling of client tickets** with written technical reports summarizing analyses and findings (research, diagnostics, recommendations)

EDUCATION

Engineer Degree in Computer Science | ISTY | Sep. 2021 – Sep. 2024

Specialization: IATIC – Information and Communication Technology Architecture Engineer

Cybersecurity Master's Degree | Paris-Saclay University | Sep. 2023 – Sep. 2024

Specialization: SeCrETS – Content, Network, telecommunications and Systems Security

Engineering Integrated Preparatory Program | ISTY | Sep. 2019 – Jul. 2021

Admitted to the engineering school through a selective application-based admission process

LANGUAGES

French: Native **English**: Professional working proficiency (B2) **Deutsch**: Notions (A1/A2) **Korean**: in learning (A1)

HOBBIES & INTERESTS

Sport: Basketball, Football **Technology**: IA & cybersecurity **Photography**: beginner, self-taught
